 **ACU**
AUSTRALIAN CATHOLIC UNIVERSITY

Dear Colleagues,

The Nursing Research Institute has been conducting a national survey across all hospitals that provide acute and rehabilitation stroke care. The survey is an international collaboration with colleagues from the UK that aim to investigate current practices and healthcare professionals' perceptions of **oral health** care for stroke patients in hospital.

The survey will be closing shortly!

We would kindly appreciate your participation and the return of the survey. We are aiming for a high response rate so our findings will be relevant and generalizable in Australia. If for some reason you haven't received the survey and would like to participate, please do not hesitate to contact us at Stroke.Survey@acu.edu.au or at (02)83823790.

Kind regards,

Professor Sandy Middleton

Director,
