University

Coordinator Survey

If you work in 'a formal or informally recognised non-medical clinical leadership position in **acute stroke** and have a role in overseeing the clinical organisation for stroke or provide support to ensure the quality of stroke care delivered' **WE NEED YOUR INPUT** – Regardless if you are a stroke coordinator, stroke liaison nurse, CNC, CNC, nurse practitioner or have another coordinator position in acute stroke care

If you have been sent an email invite from Monash University researchers to complete the survey - please try to do so -- **It is important to advocate for these essential roles in stroke, and the only way to do that is to collect data from those involved**

If you have not been contacted, but feel you are currently in a 'coordinator' position, please contact Study Coordinator Tara Purvis ([tara.purvis@monash.edu](mailto:tara.purvis@monash.edu))

Thanks for your consideration
